M A D E I N Q A T A R

Company Profile

Our business runs in the family for the last 40 years in Qatar, Mr. Gabi Mitri ,Managing Director ,has established his first company Alfa Industrial Refrigeration back in 1992 which then expanded under the name Qatar Technical. Over the years, we have dedicated ourselves to constant improvement and quality consistency, and due to our continuous efforts and exceptional works in the areas of steel fabrication, industrial refrigeration, mold & machining, electrical enclosure, building decoration and house& living related project .We have accomplished a significant successful records.

Our growing technical potentials and aspirations to prove our work and stand as a leading manufacturer in the Private Sector lead the next natural step - Qatar Technical. In QT, we incorporated larger and advanced facilities in a production area of 30000 square meter with two factories, designed to support new-product development and further enhancement of our existing products by stressing on quality consistency and compliance with international standards. we provide our customers with a wide range of complete solutions tailored to their requirements.

Qatar Technical Vision is to stand as a leading institution in both the manufacturing and engineering fields, exceeding technical achievements in the quality and reliability of our products and services to encompass development in other non-technical aspects of human potential. A long-term process realized through the provision of knowledge and awareness towards achieving an advanced, safer and greener work environment.

Plastic & Plastic Mold Division

Bucket mold and bucket

Chair mold and chair

Daily use product mold and injection part

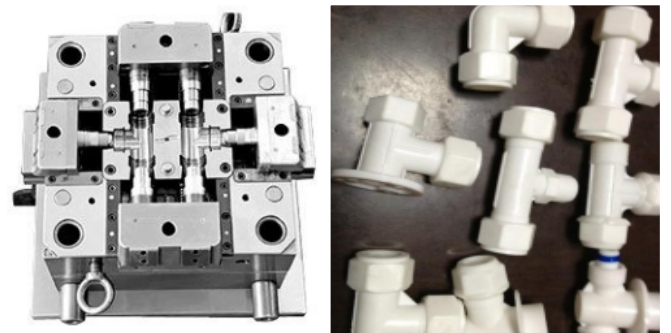

House appliance parts mold and injection parts

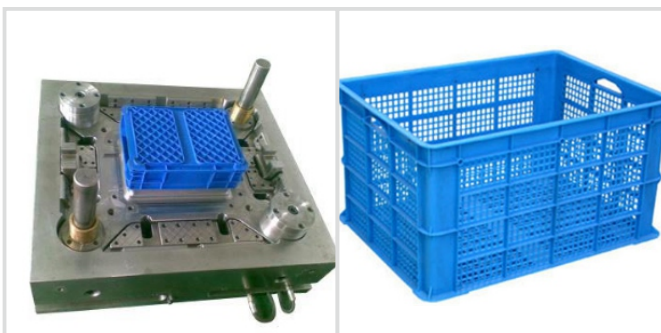

Medical product mold and injection products

Plastic pipe mold and injection products

Plastic box injection mold and injection products

Blowing bottles product and blowing mold

Plastic bottle mold and plastic bottle product

SMC mold and pressed SMC product

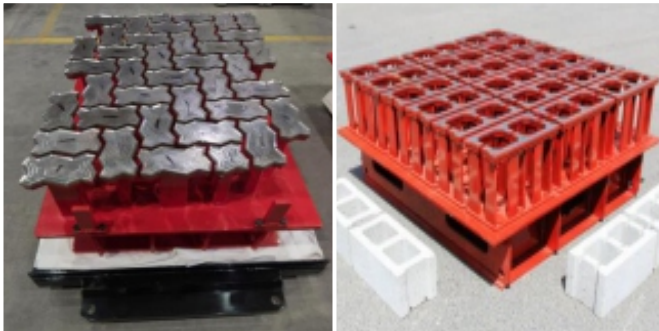

Molding & Die

Qatar Technical has an expert team of Mold designers and Die mold fabricator. Armed with skilled technician and designer and top notch design software. Qatar technical can create different types of mold from original design as per customer requirements.

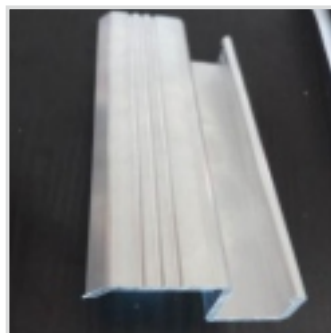

We use the highest grade steel and the most updated CNC machines. We also provide mold repair and adjustment.

Qatar technical mold guarantee ensures a cost effective and hassle-free production of your part. Mold fabrication process ensure that the forecasted mold life would be achieved and that no mold related production stoppage or costs will surface.

Aluminum profile extrusion mold

Good material of H13 with high level of machining equipment to ensure customer high quality of product. Other special requirements as per customer requirement

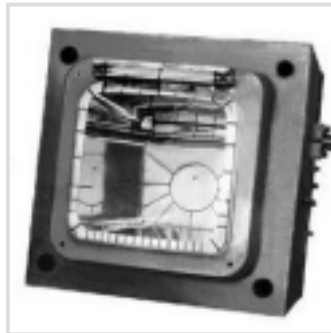

SMC mold

The advantage of SMC molding parts is as follows:

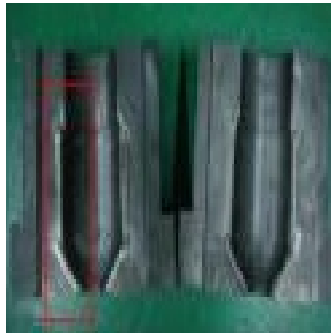

- Good dimensional stability, including excellent thermal resistance
- Pigmentable for molded-in color; best appearance with mold texture
- Excellent property retention in cold and hot environments
- Suitable for outdoor use in applications involving UV exposure and water

Mold repair and maintenance

QT provides all kinds of molding & die with maintenance service for the customer.

We also provide charging service for the mold & die which is imported and repairing is not available

Machining Division

QT has the full and complete high level machining process updated equipment. With our equipment, we can help our customer to well complete their job under the strong supporting of our engineering. Our machine are high level including CNC center, milling machine, grind machine, EDM wire cut, EDM sink, water jet, plasma cutting, furnace, lathe, drill, sand blasting and other supporting equipment, testing machine.
